EVENT DESIGN AND CATERING

...and Feasting Green

We use local foods

Local foods, wines, and beers deliver tasty mouthfuls and keep our money in our community.

We reduce and off-set carbon

We're always energy conscious and we buy carbon off-sets to counter our delivery fleet's carbon emissions.

We recycle

Recycling allows us to reduce our waste by 80%.

We compost

Now we use only bio-compostable disposables – “bio” because they're made from vegetable starch compounds; “compostable” because they can go straight in to the garden compost.

We don't use chemicals

Our cleaning and sanitation products have minimal petro-chemicals.

We educate

We educate and challenge our clients, staff, and suppliers to be environmentally aware.

We buy responsibly

We buy from suppliers practicing good environmental standards.
